## **DETAILED ACTION**

Claims 13-15, 18-21, and 24-32 are pending in the instant application. Claims 1-12, 16-17, and 22-23 are canceled.

### ***Response to Non-Final Office Action***

Acknowledgment is made of applicant's response and amendment of the claims filed on 9/23/2008.

Claim 13-32 were rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims were rejected as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. Applicants arguments and amendment to the claims have been considered, but are not persuasive. The steps are acknowledged, but the order is not clear. In claim 13, page 7 of 19, the steps need to be clarified. Where is the solvent being used. Is the solvent used during the recrystallization process or is the solvent used for precipitating out the product. Further clarification is required. Terms like "wherein" can be used before the phrase "a solvent" in line 7 to further clarify the claim language.

Claims 13-32 were rejected under 35 U.S.C. 102(b) as being anticipated by Noe, et al (U.S. Pat. No. 6,307,060 B1 ('060 Patent)). Applicants argue that the addition of the solvent specifically overcomes the '060 Patent. Examiner respectfully disagrees. Noe discloses the use of the solvents claimed in the instant application. For example, see '060 Patent, Example 1, Columns 10-11, in particular column 11, approximately lines 3-5, wherein 2-butanone is used in the workup.

Claims 13-32 were rejected under 35 U.S.C. 102(b) as being unpatentable over Noe, et al (U.S. Pat. No. 6,307,060 B1 ('060 Patent)). Applicants arguments have been considered, but are not found persuasive. (See previous office action and above discussion regarding the solvent.)

Claims 13-32 were rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 9, 10, and 15-18 of U.S. Patent Num. 6,307,060 ('060 Patent). Applicants arguments have been considered, but are not found persuasive. (See previous office action and above discussion regarding the solvent.)

In summary, claims 13-15, 18-21, and 24-32 are not patentable over the prior art. The issue is whether claims to a process of making a pure material is obvious over the prior art. It is asserted that the instant process of purification is obvious to one of ordinary skill in the art when faced with the teachings of the '060 Patent. In addition, the utility of the purified compounds and the compounds disclosed in the prior art are the same. Applicants have not demonstrated that the process of purification or the purified compounds have a different or unexpected utility from the prior art compounds. Finally, the '060 Patent was directed to the purification of compounds. Purification in general is viewed as mere experimentation within the ability of one of ordinary skill in the chemical arts. Therefore, one of ordinary skill in the art would be able to utilize the teachings found in the '060 Patent to further purify the compounds as claimed in the instant application.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
